Dr. ROBERT L. THOMPSON
will present
The Changing Geopolitics of Agriculture

1:30 PM – Purdue University, Krannert Auditorium

Dr. Robert Thompson is Professor Emeritus at the University of Illinois at Urbana-Champaign where he held the Gardner Endowed Chair in Agricultural Policy. He is also Senior Fellow, global agricultural development and food security, with the Chicago Council on Global Affairs and serves on the Land O'Lakes board of directors, the Nestle corporate Creating Shared Value Advisory Council, and the International Food Information Council Foundation board of trustees. Thompson is Chairman Emeritus of the International Food and Agricultural Trade Policy Council and formerly served on the USDA-USTR Agricultural Policy Advisory Committee for Trade.

Previously Dr. Thompson served as Director of Rural Development and Senior Advisor for Agricultural Trade Policy at the World Bank (1998-2002); President and CEO of the Winrock International Institute for Agricultural Development (1993-98); Purdue Dean of Agriculture (1987-93) and Purdue Professor of Agricultural Economics (1974-93); Assistant Secretary for Economics at the U.S. Department of Agriculture (1985-87) and Senior Staff Economist for Food and Agriculture at the President's Council of Economic Advisers (1983-85).

Thompson received his B.S. degree from Cornell University and his M.S. and Ph.D. degrees from Purdue University. He is a fellow of the American Agricultural Economics Association and the American Association for the Advancement of Science and a former president of the International Association of Agricultural Economists. In January 2011 the American Farm Bureau Federation presented him with its highest honor, the Distinguished Service to Agriculture Award.

[2016-1 GTAP 101 Course](#) *“Introduction to Computable General Equilibrium Modeling”*

The [Center for Global Trade Analysis](#) recently held the first 2016 offering of its [GTAP 101 Course](#) from January 25 – March 6, 2016. GTAP 101 is an online course aimed to engage participants in an active, team-based process of learning about the GTAP computable general equilibrium (CGE) model and its use in applied economic policy analysis. During the course, participants:

- reviewed core economic theories from macro, micro, trade and public finance and observe how they are operationalized in an applied general equilibrium model;
- learned to recognize, control and interpret the theoretically consistent behavior of consumers and producers in the model;
- observed the aggregated, macroeconomic impacts of microeconomic behaviors;
- defined model experiments that represent real-world issues and problems; and
- learned to interpret general equilibrium model results by calling on and integrating their knowledge of multiple fields of economic study.

In total, 17 individuals from 13 different countries representing government agencies, international institutions, the private sector and academia participated in this course.
