*Transforming Climate Variability and Change Information
for Cereal Crop Producers*

Monday, May 11, 2015
2:00 – 4:00 p.m.
Deans Auditorium, Pfendler Hall

***Celebrate the success of the
Useful to Usable (U2U) Team***

The award-winning team is a USDA-NIFA-supported research and Extension project focused on improving the usability of climate information for agricultural production in the Midwestern United States. This highly diverse Purdue University-led team includes partners from nine Midwestern universities specializing in climatology, agronomy, crop modeling, information technology, economics, and other social sciences. Together they are integrating biophysical and social science research to develop usable climate-based decision-support tools for farmers and agricultural advisors.
