CROP DIAGNOSTIC TRAINING AND RESEARCH

The Purdue University Crop Diagnostic Training and Research Center is known across the Midwest for its unique hands-on approach for teaching the art and science of accurately diagnosing agricultural crop problems. The Center is designed to provide informative topics in a real world environment, where agriculturalists can sharpen their crop problem trouble-shooting skills and evaluate new and alternative management strategies.

Training workshops are valuable for individuals identifying insect, nematode, herbicide, soil fertility and disease problems in corn, soybean, forages and small grains. These workshops also provide pertinent information on interacting factors (nutrient, pest and environmental stresses) that impact crop growth and development.

The long term goal of the Center is to provide quality, state-of-the-art training in all aspects of crop production and management.

LOCATION
A majority of the diagnostic training workshops will be conducted at the Purdue Agronomy Center for Research and Education (ACRE) located near West Lafayette, Indiana. West Lafayette is 65 miles northwest of Indianapolis, Indiana and 120 miles southeast of Chicago, Illinois. The ACRE is located approximately five miles west of West Lafayette, Indiana on U.S. 52 (Signage is posted).

WORKSHOP START TIMES
Most workshop check-ins open at 8:00 AM Eastern Daylight Savings Time with workshops beginning at 8:30 AM and concluding by 4:30 PM.

Note: Start times may vary, please check the agendas on the DTC webpage for exact times.

CONTINUING EDUCATION
All workshop participants will be awarded:
- Continuing Education Units* (CEUs) for Certified Crop Advisors AND / OR
- Continuing Certification Hours (CCHs) for Indiana Commercial Pesticide Applicators

Topics covered at the workshop will determine the categories and hours awarded. *Continuing Education Units offered are applicable only to the ASA/CCA Continuing Education Program.

LIMITED ENROLLMENT
Due to the hands-on nature of these workshops, enrollment is limited to 60 individuals per day (unless otherwise noted). Most often, concurrent sessions of 20-30 registrants will limit class size and provide a better learning atmosphere. To ensure your enrollment, enclose registration fees with the attached form to Purdue University. In the event of over-enrollment, priority will be given to paid registrants.

REFUNDS
Should it be necessary to cancel a workshop, registered participants will receive a full refund of paid fees. If such a cancellation occurs, Purdue University will mail a notice to participants one week prior to the event.

Written requests for refunds received one week prior to a workshop date will be honored in full.

Purdue University is not responsible for any expenses incurred by the registrant.
