The Farm Clinic is a family owned soil testing and agricultural consulting firm, based out of Frankfort, Indiana. We also have offices in Lexington, Kentucky and St. Louis, Missouri. We are an independent soil testing firm. We do not sell fertilizer or other agricultural products. Since our inception in 1939 our mission has been to provide farmers with accurate soil fertility data in order to maximize yields, while optimizing input costs. We do this by analyzing soil samples in our in-house soil lab. We then combine this data with current research on crop nutrient needs and recommend appropriate fertilizer rates, utilizing variable rate technology where appropriate.

The Farm Clinic is seeking an agronomist to join our team at our Frankfort, Indiana office. The successful candidate will be responsible for leading a team in sampling 60,000 acres per year. They will then develop fertilizer programs based on the results of the soil tests. The successful candidate will also be responsible for interacting with clients to ensure their satisfaction with the program.

Benefits:
Competitive salary.
