The Netherlands and Belgium – The Low Countries  May 10 – May 26, 2016

Learn about how geography and choices have influenced agriculture and the people of the low countries in the past, present and future. Discuss sustainability of agriculture from urban gardens to intensive agriculture to food distribution systems. Explore different types of crop and animal farms, universities and food production systems. Visit cities established from 200 BC to the middle ages. Enjoy a relaxing short river cruise along the Mosel River. Requires a 1 credit spring preparation course.
