Objective

To help you get paid fairly and what you are worth for your job after graduation

$art $mart topic

- The personal consequences of the wage gap
- Benchmarking compensation packages
- Targeting your personal compensation package
- Negotiating to be paid fairly
- Developing a bare-bones budget

Three key points

What the wage gap means to you personally
How the wage gap happens
Why the wage gap happens

NOTES
The Gender Wage Gap

A woman is paid 77 cents for every dollar a man is paid. The gap is 23 cents!

AAUW's 2013 research report *Graduating to a Pay Gap* revealed that, just one year out of college, women working full time were paid 82 percent of what their male counterparts were paid. In one year, the gap was already 18 cents per dollar!

Women college graduates will earn $1.2 million less over their careers than the young men standing next to them getting the same degree at the same time.

An African American woman is paid 69 cents for every dollar a man is paid!

A Latina is paid 57 cents for every dollar a man is paid!

This is the personal cost of the wage gap to you!
How Does the Wage Gap Happen?

First-year salaries
You started at $35,000. He started at $39,000.

Starting salaries and first-year bonuses
$35,000 $39,000
Bonus: $1,750 Bonus: $1,950
First-year total: $36,750 First-year total: $40,950

Do the math! He has now made $4,200 more than you did in the first year!

Second-year salaries and second-year bonuses
$39,000 $44,000
Bonus: $1,950 Bonus: $2,200

Let's do the math again.
YOU have earned The young man has earned
$39,000 + 1,950 = $40,950 $44,000 + 2,200 = $46,200

Second-year difference = $5,250
Over two years, the difference is $9,450.

Manager says:
“She’s pregnant. Maybe she won’t
be coming back, or maybe she
will go part time.”
Promotion only to $43,000!

Manager says:
“He’s going places. He’s management
material. Let’s put him on the
management track.”
Promotion to $53,000!

NOTES
Why Does the Wage Gap Happen?

Gender bias and stereotyping
With the same experience, qualifications, and responsibilities, you accumulate serious losses!

Gender bias: “He’s hard-charging.” (valued)
“She’s steady.” (unvalued)

Stereotyping: “Give him a raise since he has a family and more mouths to feed.”
“We’ll sidetrack her since she’s pregnant and probably not coming back.”

Gender bias and stereotyping = wage discrimination
Wage discrimination is illegal, but women also don’t act or equate action with litigation. Small inequities do not often seem worth the aggravation, risk, or expense of lawsuits.

Women rationalize not acting on wage discrimination.
“Gee, I didn’t know I was worth that much!”
“I am so grateful for what I’m making.”
“Why should I fuss or ask for more? It’s fine!”
“Maybe he’s got something more than I have. That’s why he’s earning more!”

Some women even think, I don’t need as much money as he does to live!
Your expenses
- Rent
- School loans
- Food costs
- Transportation
- Insurance
- Clothing
- Entertainment
- Utilities
- Child care

And chances are you will live longer and need more for your retirement!

Common rationale for lower salary
"I needed the job."
"I was desperate for a job."
"I couldn’t afford to lose the opportunity, so I took what I was offered."

Salary reality check
Never start salary negotiation thinking it is all about you.
Change that mind-set.
Salary negotiation is about the job and what the boss is willing to pay.
Benchmarking Your Salary

Step 1: Determine the right job title.

Step 2: Know the salary range for the job you plan to work.

Step 3: Determine your target salary.

Step 4: Research market conditions.

Step 5: Benchmark your benefits.

Step 6: Develop a budget and calculate your minimum acceptable salary.

To benchmark your salary, visit WageProject.org. When you visit the website, click on the box marked “Calculate what your job is worth.” This brings you directly to Salary.com. It is important to understand that the information about salaries for the city or zip code in which you want to work is only an approximation. The national averages on Salary.com are based on specific wage information. The zip code information is modified for cost of living and wage rates in that area. You get approximately approximate salary ranges in a zip code for free, and for a fee you can get precise salaries from employers in that zip code. You may, as you get closer to negotiating for a specific job, want to pay for more precise, up-to-date salary information. For now, these free approximations provide valuable insight for the place you want to work.
Over her working life, a woman will earn $1 million less than a man simply because she is a woman.

Don't let this happen to you... or your daughter... or your mother. Act now.

Eliminate the gender wage gap for you and every woman in America.
