* This bull is in the sale.
+ This bull is sale eligible, but was not consigned to the sale.
^ This was not adjusted to 365 days of age, this is the actual data.
RE/cwt is calculated using 365-day weight; if REA is not adjusted to 365 days, scan weight is used.
% IM Fat = % Intramuscular fat
Carcass Merit = (% Retail Product Ratio + % IM Fat Ratio)/2
Ratios for both % Retail Product and % IM Fat are computed within breed. When there are fewer than six bulls in a breed, their ratios are based upon all bulls in the test.
