

# **\*\* ATTENTION \*\***

Bulls MUST be vaccinated and boosted prior to delivery to IBEP.  
The following vaccination schedule complies with IBEP rules  
and maximizes timing for optimal immunity:

**Initial vaccination:** August 27, 2021 to September 21, 2021

**Booster:** No later than October 5, 2021

**Delivery day:** Tuesday, October 26, 2021

If your heard herd health plan has vaccination dates outside of dates listed above,  
**CONTACT** Dr. Funnell or Dr. Rusch for consultation.

## **Modified Live Viral Vaccinations**

All bulls must be vaccinated with a  
Modified Live viral vaccine.

Acceptable products are:  
Bovi-Shield Gold 5, Vista 5,  
Pyramid 5, and Titanium 5.

If you intend to use a vaccine not  
listed above as an acceptable  
product, please contact either  
Dr. Funnell or Dr. Rusch.

## ***Intranasal Vaccination***

We recommend bulls receive Nasalgen®<sup>3-</sup>  
PMH (Merck Animal Health) 4 to 10 days prior  
to delivery.

## ***Johne's test needed on ALL DAMS!***

Johne's samples need to be processed at an  
**AAVLD accredited laboratory.**

State diagnostic labs (University labs) are  
accredited and samples should be sent to  
these labs for testing.

See back for listing of AAVLD laboratory's.

**DO NOT MAKE ANY ASSUMPTIONS!**

**ASSUMPTIONS = REJECTED BULLS**

If you have any questions about the health requirements for your  
bulls, please contact:

Dr. Bethany Funnell – (765) 494-8548 or [bfunnell@purdue.edu](mailto:bfunnell@purdue.edu)

Dr. Jerry Rusch – (812) 849-4525 or [jerry.rusch@gmail.com](mailto:jerry.rusch@gmail.com)
