Indigenous Soil Potassium (K) Supply, Fertilizer K Use-Efficiency, and K Budgets in Indiana Corn and Soybean Production
Purpose: Evaluate the agronomic efficiency of currently recommended K fertilizer rates; evaluate theoretically improved soil K tests for the ability to predict soil K supply.
   Contact: Shaun Casteel and Jim Camberato; Agronomy and Alex Helms, Southeast Purdue Ag Center

Soybean Seeding Rate Trial
Purpose: Identify agronomically and economically optimum seeding rates for soybean production in Indiana.
Contact: Shaun Casteel; Agronomy

Sulfur by Foliar Protection Study
Purpose: Evaluate potential synergies with sulfur application and in season fungicide and insecticide in soybeans
Contact: Shaun Casteel; Agronomy

Long Term Impact of Cover Crops on Cash Crop Nutrient Uptake, Yield & Nitrogen Application Rate
Purpose: Evaluate barriers in cover crop inclusion; deepen our understanding of cover crop to affect the availability of manure and inorganic Nitrogen to cash crops in multiple cropping systems.
   Contact: Shalamar Armstrong, Agronomy

Weed Science Herbicide Evaluation
Non-crop trials
1. Bayer DHE, herbicide combinations for control of PPO-R Waterhemp,
2. Bayer CCO- experimental herbicide formulations for control of PPO-R Waterhemp
3. ISA-HRweeds, Indiana Soybean Alliance funded research on the influence of application parameters on herbicide efficacy
4. Graduate student project on experimental PPO-inhibiting herbicides for Waterhemp control
Soybean
1. CHS, evaluation of CHS adjuvants with Xtendimax plus PowerMax
2. Graduate student project on experimental PPO-inhibiting herbicides

Fields GWEST and E are managed with Cobra and Select with PPO herbicides to maintain PPO resistance level for future years research trials.
Aerial Reconnaissance of the Effects of Disturbed Soil Due to Recent Purpose: An opportunity to determine what can be detected using UAV cameras and sensors throughout the growing season
Contacts: Bob Nielsen & Jim Camberato; Agronomy

On-Farm Precision Nitrogen Management Purpose: Evaluation of innovative, practical, reliable and profitable PNM technology including remote sensing calibration strip based PNM
Contacts: Bob Nielsen, Jim Camberato, Dan Quinn and Davide Cammarano, Agronomy

Soybean Yield Response to Applied Sulfur Fertilizer and the Potential for Sulfur Carryover to the Following Corn crop Purpose: Evaluate the potential for residual soil Sulfur the following year for Corn.
Contacts: Bob Nielsen, Jim Camberato and Dan Quinn; Agronomy

UAV Stand Assessments of Soybean (Seeding Rate x Plant Type) Purpose: Use UAV imagery to assess stand establishment as well as standard protocol for scouting of soybean early to late season.
Contact: Shaun Casteel, Agronomy

FMC Agricultural Solutions
1. 200 Preemergence Mixtures for annual weed control in field corn in high OM soils – 19 treatments x 3 Reps
2. 202 Pre/Post systems for annual weed control in field corn in high OM soils – 14 treatments x 3 reps
3. 204 Pre combinations to add additional residual control in soybeans – 17 treatments x 3 reps
4. 206 Experimental compound premixes for weed control and crop safety in soybeans – 17 treatments x 3 reps
5. 230 Experimental compound premixes for weed control and crop safety in corn – 18 treatments x 3 reps
6. 232 Experimental compound combinations to improve residual activity in corn – 20 treatments x 3 reps
7. 235 Experimental compound POST for annual weed control in corn – 19 treatments x 3 reps
8. 240 Experimental compound PRE for annual weed control in soybeans – 20 treatments x 3 reps
9. 242 Experimental compound premixes for weed control and crop safety in soybeans – 14 treatments x 3 reps
10. 246 Experimental compounds POST + adjuvants – 12 treatments x 3 reps
11. 248 Pre/Post systems for annual weed control in soybeans – 14 treatments x 3 reps

Purpose: Evaluate Crop Response of Corn/Soy, overall efficacy of all weed species present (% control), and stalk or root lodging (corn only). In soybean trials, stand counts were evaluated to characterize the treatment effect of heavy rains after chemical application. Notes were taken on symptomology on both the crop and weed species. Soil samples were taken in order to compare results at DPAC with trials implemented at other sites around the Midwest with similar soil properties.
**Controlled Drainage for Improvement of Water Quality**
Purpose: Quantify environmental benefits of managed drainage and use of soil amendments under standard crop production.
Contact: Brenda Hofmann, Biological Science Technician and Javier Gonzalez, Soil Scientist with USDA-ARS National Soil Erosion Research Lab

**Interaction of management practices on soil health and water quality**
Purpose: Develop management techniques using cover crops and gypsum to increase soybean yield while maintaining soil health.
Contact: Brenda Hofmann, Biological Science Technician and Javier Gonzalez, Soil Scientist with USDA-ARS National Soil Erosion Research Lab

**Cover crops, phosphorus and sulfur management on soil quality and grain yield**
Purpose: Evaluate the effects of cover crops on soil phosphorus, sulfur and soil quality and grain yield.
Contact: Brenda Hofmann, Biological Science Technician and Javier Gonzalez, Soil Scientist with USDA-ARS National Soil Erosion Research Lab

**Legacy of Phosphorus**
Purpose: Evaluate soil phosphorus drawdown rates, plant phosphorus uptake, and potential changes in corn and soybean yield with elimination of phosphorus fertilizer to long-term Fertility research plots.
Contact: Brenda Hofmann, Biological Science Technician and Javier Gonzalez, Soil Scientist with USDA-ARS National Soil Erosion Research Lab

**Effect of Gypsum on Crop Yield and Soil Properties**
Purpose: Evaluate the effect of gypsum on crop yields and soil properties.
Contact: Jim Camberato; Agronomy

**Influence of the rate and frequency of FGD gypsum applications and cover crops on soil health and water quality**
Purpose: Determine the effects of gypsum on grain yield and soil and water quality.
Contact: Brenda Hofmann, Biological Science Technician and Javier Gonzalez, Soil Scientist with USDA-ARS National Soil Erosion Research Lab

Rainfall on Gypsum and Manure Plots Study
Purpose: Evaluate the effects of gypsum on phosphorus runoff from manured plots under mechanical rainfall.
Contact: Brenda Hofmann, Biological Science Technician and Javier Gonzalez, Soil Scientist with USDA-ARS National Soil Erosion Research Lab

**UAV Red-Edge Imagery to Identify Nitrogen Deficiencies in Corn**
Purpose: Document differences in light reflection in red-edge light from different corn hybrids.
Contact: Mark Carter, UAV Extension Specialist

**Topography Influences on Crop Yield**
Purpose: Use high resolution LIDAR topography data to evaluate water flow and moisture
Contact: Dennis Buckmaster, Ag and Biological Engineering

**Soybean Aphid Suction Trap Network**
Purpose: Monitor flight of soybean aphids.
Contact: Christian Krupke; Entomology

**Insect Pest Monitoring Network**
Purpose: Monitor insect pest levels of corn, soybeans and wheat.
Contact: John Obermeyer; Entomology

**Cooperative Ag Pest Survey**
Purpose: DPAC is used as a monitoring site for a statewide trap grid for the early detection of exotic, invasive insect pests of soybean and vegetables.
Contact: Larry Bledsoe; Entomology

**Heliothine Research Survey**
Purpose: Use DNA samples from Heliothine moths (Corn earworm) collected weekly throughout the United States to determine the phenology and distribution of a group of viruses known to infect those moths and determine how to use those viruses in IPM strategies.
Contact: Paul Baker, Bruce Webb UKY and John Obermeyer; Entomology

**Purdue Automated Agricultural Weather Station (PAAWS)**
Purpose: Automated collection of weather data from this site is sent to the Indiana State Climate Office at Purdue University - data can be observed at: [http://climate.agry.purdue.edu](http://climate.agry.purdue.edu)
Contacts: Beth Hall; Agronomy

**National Weather Service Weather Station (NWS)**
Purpose: Record weather data on a daily basis and maintain weather record data base.
Contact: Brad Herald, National Weather Service

**Understanding Habitat Needs of Northern Long-Eared Bats**
Purpose: Monitor activity of Northern Long-eared bats through various collection methods.
Contact: Cheyenne Gerdes, Dr. Patrick Zollner, Forest and Natural Resources

**Mixed Hardwood Demonstration Tree Planting**
Purpose: Demonstrate mixed hardwoods trees planted in Indiana and the effects deer have on growth and survival of the planted and voluntary trees.
Contact: Don Carlson; Forestry and Natural Resources

**Wildlife Shrub Demonstration Plantings**
Purpose: Demonstrate several commonly planted wildlife species and the effects deer have on growth and survival.
Contact: Don Carlson; Forestry and Natural Resources

**Forest Regeneration Demonstration Area**
Purpose: Demonstrate how a forest regenerates following the removal of the woody material. Supplemental tree planting of both standard and select nursery stock occurred on the sites along with fencing of half of the site to exclude impacts of deer on regeneration.
Contact: Don Carlson; Forestry and Natural Resources
**Long Term Continuous Forest Inventory**

Purpose: Permanent forest inventory plots have been established and maintained on most of the woodlands at Davis PAC to monitor changes in species abundance, growth, survival, and timber quality over time.

Contact: Mike Jenkins and Don Carlson; Forestry and Natural Resources

**80+ years of Central Hardwood Forest Dynamics**

Contacts: Mike Jenkins and Robert Morrissey, Hardwood Tree Improvement and Regeneration Center, Department of Forestry and Natural Resources
