Thursday August 21st
5:30—8:30 pm

Rapid growth in the local craft brewing industry has created an opportunity for Hoosier farmers to grow hops. This high-value perennial crop is used to flavor and stabilize beer. Join us at the Purdue University Horticulture Research Farm to learn about what it takes to establish and manage a hop yard.

Topics will include:

- Tall and dwarf trellis establishment
- Pruning to avoid downy mildew
- Hop pest identification
- Hop variety evaluations
- Research and outreach needs

Cost: $20 per person and includes dinner.

To register please follow the link below:
