Purdue University’s Botany and Plant Pathology department is accepting resumes for a **Weed Science Program Specialist**. The Specialist will develop and present hands-on diagnostic training in weed seedling identification, herbicide mode of action, herbicide injury-symptom identification and other timely topics of interest to trainees at diagnostic training field days. In addition, the Specialist will support the plant and pest diagnostic clinic with weed plant identification, including control recommendations when requested and diagnosis of herbicide-related injury on agronomic crops; and will author or co-author newsletter articles on various weed management issues, update extension weed science bulletins and guides.

**Requirements** of this position include a Master's degree in Weed Science or closely related disciplines combined with significant weed science experience and a minimum of two years experience as MS weed science graduate student, or two years weed science experience with closely related MS degree. Candidates must also possess: Certified Pesticide Applicator License; knowledge of the areas of weed/crop interactions, plant taxonomy, crop management systems, and weed management practices, including chemical weed control mandatory; and the ability to lift and carry 10-25 pounds frequently and 40 pounds occasionally.

Interested candidates, please apply online at [www.purdue.edu/careers](http://www.purdue.edu/careers), reference posting number 1101726. A background check will be required for employment in this position.
