Start of Block: Introduction

CONSENT Thank you for accepting our survey request. The information you provide will be used for research purposes. The following form contains an explanation of our study and your rights as a research participant.

RESEARCH PARTICIPANT CONSENT FORM

Key Information: Please take the time to review this information carefully. This is a research study. Your participation in this study is voluntary, which means you may choose not to participate at any time without penalty. If you decide to take part, please indicate so at the bottom of this form.

Purpose: Our goal for this research survey is to track consumer preferences, behaviors, and sentiments concerning the sustainability, quality, and price of food purchased and consumed in the last 30 days.

Procedures: This web-based survey will take about 15 minutes to complete. You will answer questions about topics like your food security, food expenditures, and food preferences. We also ask some basic demographic questions.

Risks of Participation: The risks associated with this study are minimal. They are not greater than those ordinarily encountered in daily life, and you may stop at any time. Importantly, this survey has a number of questions embedded in it as validity checks to ensure that you are not a robot and are fully reading and answering each question. A unique combination of answers to those questions may result in your survey being rejected.

Benefits: This study will help researchers track consumer demand for various food products, understand awareness of food-related issues, and anticipate the impact of current events or activities on the food system.

Costs: There are no anticipated costs to participate in this research.

Confidentiality: No one will have access to your name. At no point will a data file be constructed in which your name is linked with your responses. The data will be stored by the researchers with no intention to destroy the data. The data will only be released in summaries in which no individual's answers can be identified. The project's research records may be reviewed by departments at Purdue University responsible for regulatory and research oversight.

Participant Rights: Your participation in this study is voluntary. You may choose not to participate or, if you agree to participate, you may withdraw your participation at any time without penalty or loss of benefits to which you are otherwise entitled. However, you cannot withdraw the collected data, once the data is transferred to Purdue University's computers.

Contact Information: If you have questions or comments about this project, please contact the survey manager Elijah Bryant at ehbryant@purdue.edu or principal investigator Dr. Joseph Balagtas at (765) 494-4298 or balagtas@purdue.edu. To send an anonymous report, visit Purdue's Hotline

at www.purdue.edu/hotline. If you have questions about your rights while taking part in the study or have concerns about the treatment of research participants, please call the Human Research Protection Program at (765) 494-5942, email irb@purdue.edu, or write to: Human Research Protection Program - Purdue University Ernest C. Young Hall, Room 1032, 155 S. Grant St., West Lafayette, IN 47907-2114.

Documentation of Informed Consent: I have read and fully understand the consent form. By clicking below, I am indicating that I freely and voluntarily agree to participate in this study and acknowledge that I am at least 18 years of age. It is recommended that you print a copy of this consent page for your records before you begin.

- Yes, I want to participate in this study. (1)
- No, I do not want to participate in this study. (2)

For the next portion of the survey, imagine you are dining at an upscale burger restaurant which specializes in preparing both common (chicken and beef) and unusual (lion and elephant) meats. This restaurant offers both conventional and cultivated options for each meat type.

In the following 9 questions, you will be presented with sample menus for this restaurant and asked to choose between different burger options. Each option varies by price (\$10, \$15, or \$20) and production method (conventional or cultivated). Assume each burger is served with a side of fries and any condiments you'd like.

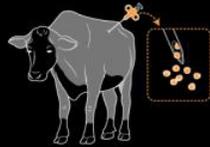

For each question, we want to know which menu item you would be most likely to order.

Please answer as honestly as possible and in a manner that you think would truly reflect how you would actually choose at a real restaurant. Don't choose a higher priced option unless you would really pay the higher price in the restaurant.

Before we ask you to select between meat options, here is a quick guide to how cultivated meat is produced.

Meat Culture

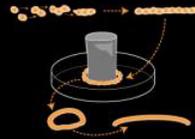

Lab-grown meat is the aim of a string of startups, including Netherlands-based Mosa Meat, which can produce a burger in weeks, compared with the years it takes to raise a cow. Here's how:

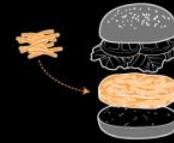

1 Stem cells are taken from an animal under anesthetic

2 Cells are placed in a nutrient-rich medium inside a bioreactor to proliferate until there are trillions of them

3 Muscle cells merge to form "myotubes," primitive muscle fiber that's placed in gel and bulks up to form small strands of muscle tissue

4 Strands are layered to produce meat, with one sample producing 800 million strands (enough for 80,000 quarter-pounders)
