THE TIPPING POINT NEGOTIATIONS:
Serious Games in Research, Teaching, Science-Policy Engagement and Earth System Governance

A 2019 AGU Fall Meeting Workshop
Tuesday, December 10, 2019  |  8:00 a.m. - 4:00 p.m.  |  Grand Hyatt - GB East

Climate tipping points are a major area of research in the AGU community, but their relevance and implications for policy-making and governance are not yet well understood. Using climate tipping points as a case-in-point for the challenges of effective science communication, this workshop explores the potential of serious games as novel tools in Earth system scholarship, teaching, science-policy engagement and governance.

WHY YOU SHOULD ATTEND
Workshop participants will:

• Learn about the potential benefits and challenges of using serious games in your own research, teaching or policy engagement.
• Build expertise in science communication.
• Understand the potential of serious games to contribute to diversity and inclusion in your classroom or research project.
• Roleplay as a national delegate in an interactive serious game simulating the international climate negotiations and learn about the Paris Agreement logic.
• Network with and learn from colleagues interested in the use of serious games.
