Required Courses from MJ Program for MS Program

Course	Description	Credits
Legal Process	The course explores the development of and relationship between common and statutory law. The course also focuses on skills needed to address effectively the meaning of law: the careful reading and briefing of cases; the interpretation of statutes; the application of precedent and the synthesis of rules from a series of cases; and the ability to support each party's position on debatable issues. In addition, this course includes a writing component, which introduces basic principles of effective legal analysis and communication, including how to structure a legal analysis and how to communicate that analysis to a legal reader.	2
Contracts and Sales I D/N 512	Introduces students to exchange relationships in contemporary American society, with some emphasis on classic contract doctrine and introduction to the Uniform Commercial Code.	3

* Selectives: For MS degree, 6 credits must be chosen from these electives of MJ program	Credits
