

ACRE 2024

JANUARY Field tile installation of Field 200 was completed. 193 acres were installed on some of the poorest drained soil on the farm.

APRIL Broke ground on new ACRE grain center.

MAY A great weather window in early May led to very timely production and research planting the first 2 weeks of May.

JUNE With Rachel out on maternity leave, Aaron and Evan stepped in to handle all farm matters with ease!

SEPTEMBER We hosted ACRE75, the 75th Anniversary of the farm, featuring demo plots by faculty and students, a fantastic dinner, keynote speaker and awarded the next installment of Legends of Agronomy.

SEPTEMBER The Ozzie Luetkemeier Endowment was created to support research at ACRE. Gifts to the endowment can be directed by scanning the QR code below or visiting the link below. purdue.ag/ozziegift

OCTOBER The first grain bin was erected at the new grain center.

NOVEMBER Finished harvest, with record setting yields, another successful field research season, and over 80 faculty conducting research at ACRE in 2024

DECEMBER The tower and leg were installed at the new Grain center.
