

Agronomy Faculty Candidate Seminar

Clinical Assistant Professor of Agronomy in Soil Fertility & Plant Nutrient Management

“Bridging Research to Practice on Nutrient Management and Soil Health in Indiana”

Dr. Bee Khim Chim

Assistant Extension Professor
University of Maine

Bee Chim is an Assistant Extension Professor at the University of Maine, specializing in nutrient management and precision agriculture, focusing on grain, rotation crops, and potato production. With extensive experience optimizing nutrient use efficiency and integrating advanced technologies to improve soil health, Bee has worked closely with farmers to promote sustainable agricultural practices. Their research and extension work bridges the gap between scientific advancements and practical applications, helping farmers implement innovative strategies for improved crop productivity and soil stewardship.

Thursday, October 17th

1:30-2:30 PM | LILY 2-425
