www.northernstarseed.com

Northern Star Seed, LLC is a leading small grains seed development and licensing company that is focused on providing solutions to help our customers grow.

Northern Star Seed, LLC is seeking a highly motivated research professional that will assist the wheat, triticale, oats and soybean research programs in the development and evaluation of superior varieties.

Responsibilities

- Assist with the planning, design and execution of breeding activities to develop new varieties.
- Organize the planning of trials. Work with 3rd party cooperators when necessary.
- Collect and analyze data on crop performance, plant diseases and pest management. Use statistical methods to interpret results.
- Assist with planting, note taking, rogueing and harvest activities.
- Prepare and present research findings through written reports.
- Lead part-time and seasonal labor to accomplish goals of research programs.
- Coordinate shipment of seed samples for internal and external stakeholders.

Requirements

- Minimum of Bachelor's Degree in an agriculture related field. A Masters Degree in plant breeding preferred, along with a minimum of two years experience in an agriculture research program.
- Valid Driver's License.
- Ability to travel frequently throughout the growing season
- Experience with PRISM or other research database software is preferred
- Knowledge of wheat or other small grains is preferred

True to our roots since 1999, Northern Star Seed has been focused on delivering industry leading, top-performing genetics for small grains, forages and soybeans. When we select varieties to offer, we put our customers first.
