MARGARET (Peggy) TITUS	Consumer Interest	First Appt: 05/01/12 Re-Appt: 06/15/23 Term Expires: 06/30/26

Indiana State Egg Board  
Annual Report  
2024—2025

The Indiana State Egg Board (ISEB) was created in 1939 with the mission of regulating the sell and commerce of eggs in Indiana to provide consumers in Indiana a safe and wholesome shell egg. Shell eggs are monitored by our field staff from the site of production to the retail store, assuring Indiana’s citizens the highest quality product possible.

The ISEB has oversight by nine directors appointed by the Governor. These directors represent the various segments of the shell egg industry and include the consumer, restaurant industry, retail/grocers, wholesalers, processors and producers. The board meets quarterly to offer guidance to staff, develop policy, and approve expenditures.

The Indiana State Egg Board has adopted the U. S. Standards, Grades, and Weight Classes for shell eggs. All eggs marketed in Indiana must meet these standards. In addition, anyone who wishes to distribute eggs in the state of Indiana must register with the ISEB. All registrations are renewed on an annual basis. Registrants are inspected to verify product quality, labeling requirements, temperature and sanitation.

In addition to the annual registration fee, wholesale registrants distributing more than 5 cases of eggs per week must report the volumes of product distributed in Indiana and pay a \$.11 per case (30 Doz.) fee to offset the cost of inspection activities and program administration.

The program not only protects the consumer but also supports the shell egg industry. The establishment and enforcement of standards for everyone in the shell egg business maintains a level playing field. Indiana is the third largest egg producing state in the nation, with approximately 36.1 million laying hens.

Indiana Statistics

274 eggs consumed per person per year<sup>1</sup>  
69% as shell eggs  
1,373,125,278 eggs consumed as shell eggs

295 eggs/hen/year production  
10,649,500,000 eggs produced per year  
Major supplier of eggs across the US

1 USDA Ag Marketing Service 2024 per capita consumption estimate

ISEB Staff

- Program Director: Mark Straw
- Licensing/Admin: Melissa Geiger
- Compliance Manager: Robert Mears
- Compliance Officers: Scott Ratliff, Robert Haynes, Abigail Huddleston, Erin Oatey

Inspection Activities

6968 Retail Inspections:

Retail Inspections to verify eggs meet USDA quality standards, requirements for labeling and temperature, and retail facility sanitation in display and storage areas.

96 Wholesaler Inspections:

Inspections to verify eggs meet USDA quality standards, requirements for labeling and storage/transportation temperature, and wholesale facility sanitation.

30 USDA – Shell Egg Surveillance inspections:

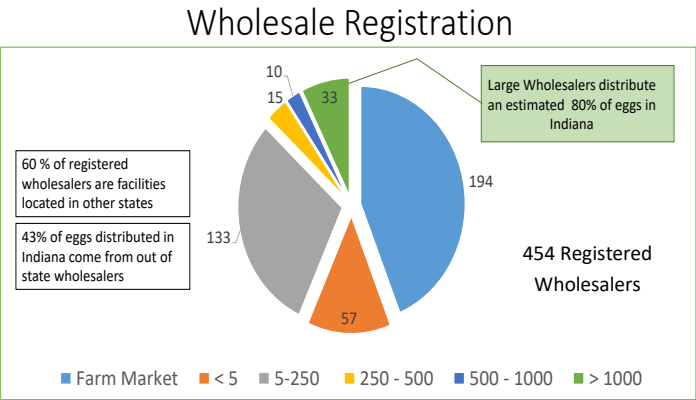

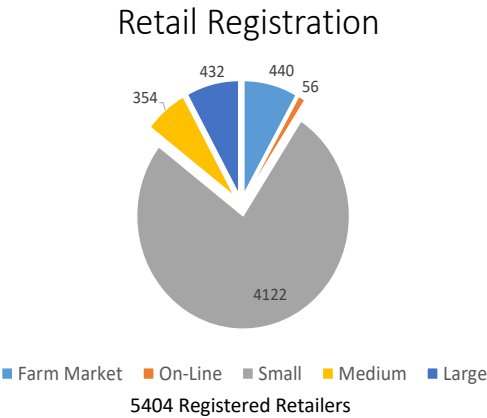

Contract inspection conducted for USDA at shell egg processors with more than 3,000 layers and grading stations in Indiana. Shell eggs packed for the consumer are evaluated using USDA Grade Standards to verify they meet the minimum requirements. Temperature, Sanitation, and labeling are reviewed. Disposal of inedible eggs are verified. Eggs can be distributed anywhere in the United States.

88 USDA – Country of Origin Labeling reviews:

Contract inspections of assigned retail locations in Indiana for compliance with the Country of Origin Labeling requirements on fruits, vegetables, nuts, chicken, and seafood. Inspectors verify these items meet the labeling requirements for country of origin and production methods/steps at the point of purchase, so consumers can make informed purchasing decisions.

57 FDA – Egg Safety Rule Inspections

Contract inspections of farms with 3,000 or more egg laying chickens for compliance with 21 CFR 118 – Production, Storage and Transportation of Shell Eggs. Inspections are conducted to verify the farm is implementing the five required actions to reduce the potential for the contamination of shell eggs with Salmonella Enteritidis. Current contract is to complete 64 targeted inspections. The largest state contract in the US.

Cases (30 doz.) Distributed in Indiana

License Category Cases/week distributed	Cases Reported	Percentage of Distribution
5 – 250	387,246	7.98
250 -500	221,940	6.17
500 – 1000	205,386	5.71
> 1000	2,883,240	80.14

Inspectional Findings

Egg inspections conducted:	6,968
Total Dozen eggs inspected:	125,321
Number of violations reported:	6,369
Eggs removed from sale (Dozens)	155,870

Reason for removal:

	<u>% of violations</u>
Restricted Eggs	91.05
Poor rotation/expired eggs	4.57
Temperature violation	.03
Sanitation	1.68
Labeling issues	2.67

Restricted Eggs are quality issues and include:

- Interior quality:* Blood spots, meat spots, mixed rots, frozen
- Broken eggs:* Leakers, Checks 9% or greater
- Exterior quality:* Dirt (adhering foreign material, fecal material, yolk)
