June 18, 2025
9:00am - 4:30pm EDT
Registration Opens April 2

Pastures are not just a one-dimensional system used to support grazing livestock. Healthy pastures are full of life both above the soil surface, and below the soil surface. In this day-long pasture ecology class, we will look at the entire pasture system and all the life it supports above and below the growing forages.

Topics Covered will Include

Dung Beetles, Root Structures, Soil Science, Water Infiltration, Soil Health, Bird and Grassland Interactions, Toxic Plants, Soil Microbial Life, Plant ID
