EXTENSION

I conduct an extension program that applies knowledge in forest regeneration and restoration to the practices of nursery seedling propagation, plantation establishment, and forest management. Through synthesis of scientific discoveries into extension presentations, workshops, and publications, I teach conceptual thinking and problem-solving skills. The following summarizes my productivity in extension and outreach: (* indicates that co-author was a graduate student; ** indicates that co-author was an undergraduate student; + indicates co-author was a post-doctoral scientist)

We published **USDA Agriculture Handbook #730** in 2008 for Native American Tribal Communities growing native plants in small nurseries. The manual received favorable reviews in the journal, *Ecological Restoration* and we received the Outstanding Technology Transfer Publication Award for 2009 from the USDA Forest Service Rocky Mountain Research Station. Sections were adapted for a nursery manual published in Argentina (citations below). In 2014, we published a new nursery manual addressing tropical environments as **USDA Agriculture Handbook #732**. This manual was also named the Outstanding Technology Transfer Publication for 2014 by the USDA Forest Service Rocky Mountain Research Station.
