

THE DEPT OF FORESTRY & NATURAL RESOURCES PRESENTS

# FALL 2025 SEMINAR SERIES

MONDAY, SEPTEMBER 15TH  
WSLR 116 3:30 PM - 4:30 PM

JOIN US FOR A LECTURE AND CONVERSATION

Dr. Eric Schauber is the Director of Research and Programs for the Renewable Energy Wildlife Institute (REWI).

**DR. ERIC SCHAUBER**

## Science to Navigate the Green-Green Dilemma

The 21st century has seen a rapid energy transition away from fossil fuels and toward renewable energy sources, especially wind and solar power. The speed of this shift has heightened the so-called "green-green dilemma" between the crucial but relatively intangible long-term benefits of renewable energy and the abrupt and highly visible changes in local land use and environment. This presentation aims to:

- 1) Explore the complex tradeoffs and constraints involved, to lay the groundwork of key issues, possibilities, and knowledge gaps; and
- 2) Highlight recent collaborative research that is advancing our understanding of the direct impacts of renewable energy on wildlife and ecosystems and developing solutions to reduce harm and enhance benefits.

This series aims to stimulate discussion and create opportunities for collaborations. **Everyone is welcome to attend.**

**LOCATED AT 170 S UNIVERSITY STREET, WEST LAFAYETTE, IN 47907**
