

FNR 46000: International Natural Resource Issues in Sweden, Finland, & Norway

In Summer 2023, we will travel to sites across northern Scandinavia and Finland (July 3 – July 28, dates tentative).

Purdue contacts: Dr. John Dunning, jdunning@purdue.edu

Dr. Tomas Höök, thook@purdue.edu

Dr. Douglass Jacobs, djacobs@purdue.edu

In this 4-week course, we will examine natural resources broadly defined, including forestry, fisheries, wildlife, agriculture, mining, outdoor recreation, and urban sustainability. We will define, discover, and document examples where sustainability of resource use matters. The course explores the effect of terrain, climate, vegetation, faunal assemblages, social structures and technologies on natural resource use. FNR 46000, 3 credits, is a collaboration of Purdue University, North Carolina State University, and the Swedish University of Agricultural Sciences. American and Swedish students work together to research issues in resource management.
