Program Leaders: Peter Hirst & Diane Wang
hirst@purdue.edu | dianewang@purdue.edu

Callout: Sept 9, 2024 @ 5:00 pm in Hort 222

This faculty-led 15-day study tour will take students through the North Island of New Zealand. We will survey and learn about New Zealand's natural beauty, culture and agriculture. We will view and discuss a wide range of topics including sustainable horticultural and agricultural production, environmental conservation, Maori culture, farmer's markets and of course Hobbiton. Agriculture in New Zealand is incredibly diverse and we will be seeing vegetables, dairy, avocados, kiwifruit, vineyards, apples, honey, sheep, beef, and well as value-added production at a winery and craft brewery.
