Welcome to the ACRE Prairie

Prairies made up 15 % of Indiana, mostly found in the northwest!

Park Hours: Dawn to Dusk

Take a walk around and try to notice the lively ecosystem of a prairie. The native plants and animals create a beautiful scenery that used to be abundant across the Midwest and Great Plains. Please refrain from picking any vegetation or touching the animals but do try to notice the unique scents from the wildflowers.

Please check out the ACRE Prairie website for more information!

Caution: Pollinators (i.e., bees) are very active when wildflowers are in bloom, please avoid aggravating these crucial critters.
