

Farm Operations/Technical Coordinator

Beer Family Farm, LLC is a progressive hog and grain operation located in Northern Indiana (Milford) that has been growing for nearly 40 years. We are committed to a faith based mentality with a culture that seeks to provide above average income, opportunity, and equity to those we serve and employ. We farm 3000 acres and have a Pioneer seed dealership as well as a 2000 sow farrow-finish operation. Our equipment is well maintained and our swine facilities are newer, and mostly built over the last fifteen years.

We are looking to add a business minded team player with management skills who is proficient in selecting, integrating, and optimizing technology as well as knowledgeable in agronomics. If you enjoy leading and developing people, having influence and impact on an operation, ag systems and processes and long term growth opportunities, this job may be for you!

We offer competitive compensation relative to your background and experience along with paid holidays and vacation time. Relocation and housing assistance available if required.

What you will be doing:

- Computer Data Entry/Generating Reports
- Ag Analytics and change management
- Specific Maintenance and Repairs
- Supporting livestock operations (pigs)
- Developing Systems and Processes to increase efficiencies within the operation
- Participating in busy seasons by operating heavy farm equipment
- Selecting, integrating, and optimizing technology

This job is for you if you have:

- Prior experience operating farm equipment
- A history of progressive levels of responsibility and commitment to your profession
- Proven ability to keep detailed records and analyze data
- A Bachelor's degree in an Ag related field or equivalent work experience
- Strong work ethic with integrity and an overall view of the success and sustainability of the farm.

Please submit your resume to annembeer@gmail.com
