

About Albertson Drone Service LLC

Founded in 2020, Albertson Drone Service emerged from a vision to revolutionize agricultural practices through innovative drone technology. With a commitment to enhancing efficiency and sustainability, we have quickly established ourselves as a leader in the drone service industry. Our founder, Kyle Albertson, a Purdue Alum, recognized the potential of unmanned aerial systems (UAS) to transform traditional farming and environmental restoration methods. Since our inception, we have dedicated ourselves to providing high-quality aerial services tailored to the specific needs of our clients.

At Albertson Drone Service, we operate state-of-the-art Agricultural drones, including DJI Agras T40, Talos T60X, XAG P150, and multiple high-resolution camera drones, to deliver our specialized services.

Our Services:

1. **Aerial Pesticide Application:** Utilizing precision spraying technology on our DJI drones, we efficiently apply pesticides on corn, soybean, and wheat fields to enhance crop protection.
2. **Wetland Restoration Projects:** We provide aerial assessments and monitoring to support effective wetland restoration and management.
3. **Insect Control for Livestock Operations:** Our drones deliver targeted treatments for insect control, ensuring the health, comfort, and safety of livestock.
4. **Crop Scouting:** We utilize high-resolution imagery to monitor crop health, assisting farmers in making informed decisions for their operations.
5. **Aerial Photography:** Our advanced camera drones capture stunning aerial imagery for marketing and surveying purposes.

We are looking to expand our team to include passionate individuals who want to help us drive innovation in the agricultural sector. If you are interested in joining a forward-thinking company that values technology, sustainability, and teamwork, we invite you to apply for our open positions!

Albertson Drone Service: Remote Pilot Internship

Transforming Agriculture with Cutting-Edge Drone Technology

Location: Fowler, Indiana

Duration: April 2026 - October 2026

About the Role:

We're seeking a dedicated Remote Pilot Intern to join our dynamic team for the upcoming season. This internship offers invaluable practical experience operating UAVs for diverse agricultural applications. You'll work closely with experienced pilots and technicians to execute aerial pesticide applications and support various project operations.

Key Responsibilities:

- Operate drones to aerially apply pesticides in accordance with safety regulations and company protocols.
- Manage and tender the drone by changing batteries, refilling tanks, and preparing pesticide mixtures for application.
- Drive a tender rig to and from job sites.
- Collaborate with team members to ensure efficient workflow during the busy season (June - August).
- Assist in documentation and reporting related to drone flights and pesticide applications.
- Maintain compliance with FAA regulations and company standards for safe flying practices.

Qualifications:

- Valid Driver's License.
- FAA CFR Part 107 Remote UAS Pilot License.
- FAA 3rd Class Airman Medical Certificate.
- Indiana Core and Category 11 State Pesticide License (or equivalent from another state).
- Ability to work flexible hours, including weekends when necessary during the busy season.
- Passion for agriculture and innovation.
- Strong teamwork and communication skills.

What We Offer:

- Hands-on experience in a cutting-edge agricultural drone service.
- Opportunities to work with state-of-the-art Agricultural drones, including DJI Agras T40, Talos T60X, XAG P150, and multiple high-resolution camera drones.
- A collaborative and forward-thinking team environment.
- A chance to drive innovation in the agricultural sector.
- \$20 per hour, with the opportunity to earn a year end bonus based on performance.

To Apply:

Interested candidates should apply using the following link:
