

2025 Summer Internships

+ Agronomy Internship

Learn Agronomy from the ground up! Cropwatch is an Independent Agronomy firm located in Sturgis, MI that is family owned and operated. We are looking for summer interns to learn and deploy their skills scouting many different types of crops. In addition to that, there are opportunities to learn how to operate a DJI sprayer drone.

+ Essential Job Functions

- Ability to work alongside peers as a team
- Ability to walk many fields throughout a day/week
- Ability to communicate with Superiors and Team Members efficiently

+ Education and Experience

- Agriculture related Major preferred
- No prior experience in Crop Scouting required
- All grade levels considered

+ Compensation and Benefits

- \$15-20/ hour based on experience
- Paid housing available

+ Working Conditions

Working Conditions	Details
Hours of work	Average 40-50 hours a week with opportunity for more. Typical work day 7am - 5pm
Work environment	Work alongside our Agronomists or work in crews most every day. This gives you the ability to lean on others for help and learn from Agronomists or peers.
Travel requirements	Once you arrive at work, company trucks are provided for all work activities. Most fields are within 45 miles of the office.
Expectations	We don't expect you to know much about Agronomy, that is the point of an internship, but if you do that's great, we can help further it. We are looking for people who are interested in the field and have a desire to further their Agriculture knowledge.

+ Paid Housing

- Apartment at Glen Oaks Community College, 9 miles from work.
- May be shared with other interns, but everyone gets their own room.

+How to Apply

- Email Resume to kyle@cropwatch.us or visit us at www.cropwatch.us
