

SweetWater Technologies – Sullivan, IN Summer Internship Description

Job Title: Drone Operations Intern

Location: Sullivan, Indiana

Duration: May 26th – August 10th (subject to change if necessary)

Description:

Join Sweetwater Technologies as a Drone Operations Intern for the summer! This internship offers a unique opportunity to engage with cutting-edge drone technology in the field of precision agriculture. You will operate drones to perform tasks such as chemical application, data collection, and field mapping, contributing to innovative agricultural solutions.

Responsibilities:

- Pilot drones to apply chemicals from the air
- Assist in the maintenance and troubleshooting of drone equipment
- Analyze data to support agricultural decision-making
- Communicate with farmers and other clients on day to day jobs

Requirements:

- Enrolled in or graduated with a degree in Agriculture, Environmental Science, Engineering, or a related field.
- Interest in drone technology and precision agriculture.
- Strong problem-solving skills and attention to detail.
- Excellent communication skills and ability to work as part of a team.

Testing:

- Part 107 UAG Drone Exam
- TSA background screening for Part 107 Certificate
- Class 2 Aerial Medical Examination and Drug Test
- Aerial General Standards Pesticide Exam
- SweetWater Technologies Training Program

To Apply:

- 1) Send a copy of an updated resume to sullivan.in@sweetwatertechnologies.com
- 2) Make sure to include "Internship Application" in the title block of the email
