Post-Doctorial Associate in Silviculture, University of Florida

The North Florida Research and Education Center in Quincy, near Tallahassee, has an open position for a post-doctoral associate to support research programs to evaluate the effectiveness of silviculture BMPs and to improve silvicultural practices for longleaf restoration, short rotation woody crops, commercial pine silviculture and the control of invasive species. Candidates must have shown proficiency in the conduct of silvicultural field research, data management and statistical analyses, and publication in referred journals. Funding is available to support this position for 27 months at $48,000 per year, plus benefits. To apply please provide a letter of intent, academic vita, and letters from three references to Dr. Pat Minogue (pminogue@ufl.edu). Applications will be accepted until November 16, 2015. The anticipated start date is January 4, 2016.
