Environmental Manager

Job#: 01010094
Deadline: 6/7/2016

To Apply

Employer: Weyerhaeuser
Location: Dodson, LA

Description

The Environmental Manager is responsible and accountable for environmental processes at the Dodson, Louisiana, Lumber mill. This position will lead the implementation of environmental processes and champion best practices to meet customer satisfaction. This position will maintain all environmental records and lead compliance and proactive environmental systems. This person ensures Federal and State compliance with environmental regulations and permit conditions and champions best practices to improve unit performance. This position partners with the Mill’s leadership team to establish and model organizational behavior that leads to excellent mill performance. This position will report to the Mill Manager.

Key Functions:

Role model all standards/processes and on-the-job behavior by living our core principles of integrity, fairness, & creating a positive inclusive work environment.

Ensure compliance with environmental regulations and permit conditions on a daily basis.

Ensure that inspections and recordkeeping are performed at required frequencies, and that environmental monitoring parameters are in accordance with permits, plans, government regulations, or other regulatory or Company requirements.

Build relationships with parish, state and federal agencies concerning environmental compliance.

Ensure proper and timely implementation of facility environmental plans and procedures.

Record and report pollution upsets to the facility manager, appropriate regulatory agencies, and to the appropriate Company environmental contact.

Support and/or lead facility environmental compliance audits at the facility.

Maintain environmental records at the facility for mandatory retention periods or as determined appropriate.

Conducts environmental training for all employees as required.

Participate as an active member of the Unit’s lead team to actively support unit and business goals and objectives and establish and model organizational behavior.

Own and/or contribute to other mill functions, such as safety initiatives.
**Qualifications/Requirements:**

BS Degree (or higher) in Environmental Science and 3 years experience with environmental practices in an industrial / manufacturing environment.

Must be able to lead and ensure compliance with environmental and safety initiatives.

Knowledgeable in environmental requirements and permits (including air, municipal, state and federal waste requirements, storm water, spill control, hazardous materials, and chemical management).

Knowledgeable of compliance management.

Experience in compliance auditing process and internal/external audit/review.

Experience in administering, managing and training of environmental policies and regulatory requirements.

Ability to develop permit applications and manage permit requirements.

Excellent interpersonal, written, verbal and electronic communication skills.

Strong planning and organizational skills.

Ability to lead and promote teamwork.

Excellent work ethic with initiative to get things done with minimal supervision.

Excellent integrity with passion to perform and make the right decision.

Willingness to support a 24/7 operating environment, which may include weekend and holiday support as conditions require.

Good judgment and decision-making skills with ability to analyze difficult situations.

Ability to achieve and sustain business and unit goals.

Demonstrated computer skills and proficiency in MS Office and other windows based programs.

Ability to perform the essential job functions of working in an industrial environment, such as climbing stairs and working in extreme heat and cold.
