International Natural Resource Issues in Sweden, Czech Republic, Poland

In Summer 2020, course will be held in the mountains and coastal regions of northern Sweden (July 1 – July 26). Purdue contacts: Dr. Douglass Jacobs, djacobs@purdue.edu; Dr. Tomas Höök, thook@purdue.edu; and Dr. Patrick Zollner, pzollner@purdue.edu.

In this course, we will examine natural resources broadly defined, including forestry, fisheries, wildlife, agriculture, mining, outdoor recreation, and urban sustainability. During four weeks we define, discover, and document examples where sustainability of resource use matters. The course explores the effect of terrain, climate, vegetation, faunal assemblages, social structures and technologies on natural resource use. The course is a collaboration of Purdue University, North Carolina State University, and the Swedish University of Agricultural Sciences. American and Swedish students work together to research issues in resource management.
Details

Costs
- Study Abroad fee (@$308)
- airfare to the host city (@$1100)
- course fee of about $1590 (Reduced by $500 from FNR dept subsidy)
- Food
