

Updated: December 2018

Ms. Melissa Widhalm is an operations manager with the Purdue Climate Change Research Center located in West Lafayette, Indiana. She serves as the program coordinator for the Indiana Climate Change Impacts Assessment (IN CCIA), a statewide collaborative effort to develop a series of reports designed to help Hoosiers better understand climate change-related risks to they can better prepare for the future. In this role Melissa is responsible for overseeing report development and dissemination, and she strives to increase dialogue about climate change throughout Indiana. Melissa has a Bachelor of Science degree in meteorology from Northern Illinois University and a Master of Science degree in natural resource science from the University of Nebraska-Lincoln. Prior to joining the PCCRC, Melissa spent six years as the project manager for the award-winning Useful to Usable (U2U) project where she helped improve the use of climate information for Midwestern farmers and their advisers. Her interests include applied climate science, science communication, public engagement, and interdisciplinary project management. Born and raised in the Midwest, Melissa currently resides in West Lafayette, IN where she spends her free time baking, reading and spending time with her partner & children.
