Animals and Hunger Service Learning in Paclișa, Romania

Are YOU ready to work in a binational team across agricultural and community disciplines and make a difference – for credit?

- Upper-class students must be interested in enabling families to overcome poverty and make lasting improvements in their quality of life and achieve self-reliance.
- The class will live and work in the village and spend the weekends visiting historic and cultural sites lead by host-country university agricultural sciences & veterinary medicine students.
- Two-three Purdue students will become team members with an ANSC, Agriculture, or Veterinary Medical student from the UASVM at Timisoara and work together for the course duration.
- Students will learn about sustainable community projects through application of agricultural ecology, animal well-being focused management, and economic agribusiness projects.

- Projects will include animal husbandry (sheep, cattle, poultry and horses) and facility design and construction, agronomic improvement of land use and efficiency, youth and adult education.
- We will have fun visiting historical & cultural places you will likely not go on vacation – Sighisoara, the birthplace of Vlad Tepes (Dracula), 13th century Deva Castle in Transylvania, and college towns of Timisoara, Cluj-Napoca, and Sibiu.

Maymester May 17 - June 11, 2010
Three credits
Program fee of approximately $2900*
Apply before November 30
