

International Natural Resource Issues in Canada's Pacific Northwest

In Summer 2016, course will be held in British Columbia (Canada) and US Pacific Northwest (June 27 – July 22).

Purdue contacts: Dr. John Dunning, jdunning@purdue.edu

Dr. Tomas Höök, thook@purdue.edu

Dr. Doug Jacobs, djacobs@purdue.edu

In this course, we will examine natural resources broadly defined, including forestry, fisheries, wildlife, agriculture, mining, outdoor recreation, and urban sustainability. During four weeks we define, discover, and document examples where sustainability of resource use matters. The course explores the effect of terrain, climate, vegetation, faunal assemblages, social structures and technologies on natural resource use. The course is a collaboration of Purdue University, North Carolina State University, and the Swedish University of Agricultural Sciences. American and Swedish students work together to research issues in resource management.
