Ag Ingenuity Partners/Advanced Agrilytics Intern Position

We are seeking field/lab-based interns for the 2018 Fall/Winter season. Internships are part-time or full-time with the potential for over-time hours. Interns will be focused on one or both of the following:

- On-farm scouting to assess crop conditions and identify potential problems; and/or
- Contract research efforts of spatial nature to collect/record in-field data. All interns will gain experience in general Agronomy, GIS, Plant Pathology, Entomology, Weed Science and data collection and evaluation.

Qualifications:

- Current undergraduate GPA of 2.5 on a 4.0 scale.
- Agriculture or Science degree track preferred.
- Willingness and ability to work under on-farm conditions.
- Understanding of current farming practices is of benefit.
- GIS experience a plus.
- Must be task/project driven and able to work independently.
- Excellent oral communication skills.
- Microsoft Office proficient.
- Safety oriented.

Compensation and Benefits:

- Competitive hourly pay commensurate with experience.
- Travel and mileage reimbursement.

Contact Information:

To apply for one of our 2018 Fall/Winter Internships please submit a recent copy or your resume as well as a brief (one page) letter of intent that outlines your specific experiences and professional goals that would translate to our needs.
