Job Description-Agronomist

$35000 - $40000 based upon hourly wage plus overtime

Seed Research Company is seeking an Agronomist to work out of your home in central Indiana. This is a hands-on position as you'll be working multi-acre plots planting and harvesting corn. You will be operating custom built plot planters and Wintersteiger plot combines. Part of your job will be transporting this equipment to the different plots, thus you'll need a Class A CDL Driver's License or be able to get one. When not operating machinery, you will be scouting plots, taking detailed notes, and uploading information. This job will require you to have very good agronomy training, excellent computer skills, and a clean driving record. You must be able to work unsupervised and travel 170 nights per year. The company takes care of all of your expenses and provides you a great opportunity to see the country, and to experience the seed industry in a hands-on career opportunity.
