JOB OPENING
Veterinary Assisting Instructor
For 2016-2017 school year
Grades 9-12

Location of the Job – City and State
Career Academies of Seminole
12611 86th Avenue North
Seminole, Florida 33776

Courses / Subjects Taught – Veterinary Assisting
State of Florida certified (or certifiable) agriculture teacher to provide classroom, laboratory instruction in working with large and small animals, as well as market and companion animals, using the state’s veterinary assisting curriculum frameworks that support Florida's core curriculum standards. To additionally enhance instruction, directed laboratory experiences, student projects, participation in FFA animal competitions, and cooperative workplace experience opportunities will be made available. Industry certification for veterinary assisting is a key element of the program. A high level of involvement and participation in the National FFA Organization (FFA) is also required, as well as animal care/feed duty, for additional pay, on weekends and holidays, shared with another instructor.

School Demographics - About the school
Located minutes from the beaches, Career Academics of Seminole is a small, quiet satellite campus that offers five career and technical programs, serving students, mostly from high schools in mid-Pinellas County, Florida. Students in grades 9 – 12 attend part-time within their normal school day. Average enrollment is 350 students. The only requirement for enrollment is an interest in our programs. Instructors teach three classes per day in a block schedule. Class sizes are average, and because students are bussed to and from their home schools, there is ample time for planning mid-day and after students leave our campus. Student demographics reflect the diversity of Pinellas County. Visit our website at www.pcsb.org/cas for more information.

Experience Required / Educational Requirements / Minimum Years of Experience / Duties and Responsibilities
- Bachelor’s Degree in Agriculture and be eligible to hold a Florida teaching certificate.
- Provide documentation of a background or training in the veterinary sciences, and working with large and small animals.
- Exhibits the ability to train and support students in FFA market animal projects and leadership activities, as well as in local and state competitions; and can collaborate with local veterinary industry representatives.
- A working knowledge or willingness to be trained in the care and feeding of companion and livestock animals.
- Certified in veterinary assisting or higher credential, or willingness to obtain the certification.
• Enter contracted services for additional pay to care for on-campus animals on weekends and holidays.
