We are looking for a motivated employee that is a hard worker and loves to learn. Hours: 20-30 per week. Please send your resume to the email above and what makes you stand out! Animal Science and Pre-Vet Majors are the best candidates for this job.

Duties:

- Provide daily care and treatment of swine, including cage cleaning, feed preparation, feeding, monitoring health status, and obtaining body weight measures.

- Monitor female pigs for estrous cycle, pregnancy, and farrowing in the systematic breeding of pigs to develop and maintain select genetic lines.

- Able to assist in processing piglets (needle teeth clipping, ear notching, and giving IM injections) and tagging piglets.

- Provide routine health maintenance of pigs, including vaccinating and giving medication via IM injections and orally.

- Must be able to handle miniature swine, lift 50 lb bags of feed, lift cages, clean pens, tolerate extremes of hot and cold air temperature at the Facility.

- Some cleaning duties like sanitize rooms, organize supplies, and emptying pit into slurry tank.

- Maintain close contact with veterinarian and veterinary staff regarding health status of pigs.

- Maintain health records of pigs.

- May assist in hoof trim and tusk trim procedures.

- When needed, mix and weigh specialized pig diet.

- Inventory supplies and ingredients.
