INDIGO RESEARCH PARTNERS INTERN

Indigo improves grower profitability, environmental sustainability, and consumer health through the use of natural microbiology and digital technologies. Utilizing beneficial plant microbes and agronomic insights, Indigo works with growers to sustainably produce high quality harvests. The company then connects growers and buyers directly to bring these harvests to market. Working across the supply chain, Indigo is forwarding its mission of harnessing nature to help farmers sustainably feed the planet. The company is headquartered in Boston, MA, with additional offices in Memphis, TN, Research Triangle Park, NC, Sydney, Australia, Buenos Aires, Argentina, and São Paulo, Brazil. The role of the Indigo Research Partners Intern is to work in the fields and help Technical Service Representatives and Hub Managers understand the effect of various technologies. This is an exciting opportunity to be part of a fast-growing startup with a mission of harnessing nature to help farmers sustainably feed the planet. This role is expected to require 40 hours per week.

**Responsibilities:**

- Develop and help manage/collect data in the fields
- Document where all of Indigo's fields are and ground truth as directed by Hub Staff.
- Manage the photo documentation of all plant data and plots with a camera or a drone
- Assist with any additional projects the Indigo Partners team may need

**Competencies:**

- Background in agriculture and farming preferred
- Excellent documentation skills
- Strong ability to read and interpret maps
- Pays careful attention to detail
- Willing to work long hours outside
- Ability to work independently and as part of a team
- High energy, enthusiastic, positive attitude
- Alignment with Indigo's mission and core values
- Ability to travel
- Commercial driver's license
- Photography and/or experience with drones a plus
Indigo Agriculture, located here in the West Lafayette area is a research testing company working with growers across the state in corn, soybean, and wheat field scale research work. We have a couple internship opportunities currently available, both here in Indiana and also with our Research Hub in Ohio. Your name was forwarded onto me as you may have some Ag Econ students still looking for an internship for this summer. A little bit about the opportunity, this will be research field based, responsibilities may include: corn, soybean, and wheat crop scouting, data collection and management, tissue and soil sampling, working with UAVs and other activities related to Indigo Research Partners. I have also attached a brief description of what is expected, please note a commercial driver’s license is NOT going to be required, this was a typo. I would also add that this internship will require outdoor field work during the summer months and expected availability is 40 hours a week. However, additional time may be asked including possible weekend work (minimal). We ask that interested candidates please apply online at the below web addresses and we will be setting up face to face interviews in the coming weeks. Thank you very much for you time and consideration.
