KCI Technologies, Inc  
Scientist Intern  
Indianapolis, IN  
Hours per Week: 40  
Wage/Salary: Paid  
Employment Start Date: May  
Employment End Date: August  

*Job Description: This is a paid internship opportunity with the Indianapolis office of KCI Technologies, a multi-discipline engineering firm with offices throughout the eastern United States. There is also the potential that this position could be located in our Nashville, TN or Raleigh, NC offices. The internship would support the stream and wetland restoration work that we conduct in Indiana, with the potential to travel to other offices if the need arises. The majority of the summer would be spent in the field, but would also include time in the office. The fieldwork includes vegetation monitoring, stream surveying, and wetland data collection, and is likely to be strenuous and physically demanding. The office work includes data processing, report writing, and GIS assistance. This is a good internship for students who are interested in restoration work and are looking to gain experience with a consulting company. Qualifications: Fieldwork experience having to do with streams and wetlands, familiarity with natural resources mitigation, Indiana tree identification. Minimum GPA of 3.0 required.

*How to Apply: Students must apply via the following website [http://www.kci.com/careers/internship](http://www.kci.com/careers/internship). The application **deadline is midnight, January 31st.** In addition to applying via the website, please also email me [brad.shoger@kci.com](mailto:brad.shoger@kci.com) letting me know that you have applied, so that I know to look for your name in the applicant pool. The job title is listed as Engineering Intern, but this is open to all students, not just engineers. The location is listed as Maryland, but I will be selecting an intern for the Indianapolis office and potentially other locations. Additionally, when selecting an area of interest, please select natural resources or resource management.
