Limagrain Cereal Seed -
Paid Summer Internship 2016

Wheat breeding

Description

Our company is looking for a student from the college of agriculture to join our team for the summer field season. Our station runs a wheat breeding program based out of Lafayette Indiana. The interns hired for this position should expect to learn many facets of agricultural research and plant breeding. Interns will leave this position with invaluable skills and industry knowledge, so please apply regardless of your year and experience level.

Responsibilities may include

- Manage a team of part time employees
- Gather data through field notes/grain samples
- Collecting/cleaning/treating samples
- Maintaining field sites

Requirements

Applicants should be from the college of agriculture with a focus on plant breeding/agronomy preferred but not required. The ability to work independently and a strong work ethic are essential. Applicants must have their own transportation to the Lafayette research station. There will be some overnight travel with the research team.
