2016 Summer Scouting Positions

The Job:

Responsibilities will include the monitoring of seed corn fields. Fields are to be monitored regularly for infestation of insects, weeds, plant diseases and making quality inspections. You will be exposed to use of GPS technology in training. You must have your own vehicle.

Experience and Training:

No previous experience is required. We are looking for self-motivated students that enjoy working outdoors and are capable of making detailed observations. Training will begin early May, the week after spring finals are completed. Additional training will be provided throughout the season.

Area of Work:

The production areas we are in need of assistance are located south of Lafayette near Romney and Shadeland.

Compensation:

Wages begin at $12 per hour. Mileage is paid at prevailing rates. Summer employment averages about 40 hours per week.
