## **Test Analyst Intern**

### **Position Details:**

- **Company:** Tecsoil USA, Inc. (dba Solinftec)
- **Location:** West Lafayette, IN
- **Travel:** Yes (Local to West Lafayette Office)
- **Position Type:** Part-time
- **Contract Length:** 5 weeks, 30 hours per week maximum
- **Contract Salary:** \$13.33 per hour
- **Industry:** Digital Agriculture
- **Visa Sponsorship:** Not at this time

### **About Tecsoil USA:**

Tecsoil USA, Inc. is an exciting early stage, high growth company established in the Purdue Research Park by Brazil-based digital agriculture company Solinftec. Solinftec is investing in U.S. headquarters to expand our company's innovative IoT-based farm management system to the U.S. agriculture industry. Our proprietary technologies support increased efficiency of all agriculture operations such as planting, harvesting, and spraying by monitoring all processes and providing real-time data for continued increase in crop returns.

Our success is dependent upon great minds, collaborating to generate and deliver unique solutions. We are not a conventional company and we do not intend to be. We are an engineering company passionate about rapid and continuous development of software, hardware, and mobile application solutions for our clients. We are a leader in digital agriculture for the Brazil sugarcane industry and are expanding our presence in the U.S. agriculture industry.

### **About the role:**

We are looking for a Test Analyst Intern to join our Research and Development team. As a Test Analyst Intern, you will participate in stress testing of our proprietary technology and mobile applications, working with a small team of developers, to ensure a clean solution release for our clients' spraying operations.

### **Role Responsibilities:**

- Execute test requirements from developers for mobile application user acceptance and release testing.
- Carry out regular and repeated testing for updated app release versions.
- Report test results with clear and concise descriptions of the test activity and any issues that may occur.

### **Desired Skills:**

- Verbal communication, organization, and schedule flexibility
- Professionalism and confidentiality
- Basic understanding of agricultural operations

### **Qualifications:**

- In 3<sup>rd</sup> or 4<sup>th</sup> year of undergraduate program in Agriculture, Computer Technology, Engineering or similar
- Beginner experience level (0 – 1 years' experience)
