Information Technology – Cloud Engineer Intern (Chicago, IL)

About Syngenta
Syngenta is a leading agriculture company helping to improve global food security by enabling millions of farmers to make better use of available resources. Through world class science and innovative crop solutions, our 28,000 people in over 90 countries are working to transform how crops are grown. We are committed to rescuing land from degradation, enhancing biodiversity and revitalizing rural communities.

About this Job:
We believe that that most IT departments witness change, we aim to cause it by discovering and applying new and novel technologies to real world problems. We are looking for curious, determined and high performing individuals who will push hard for breakthroughs that help the company.

The Cloud & Compute team is a key component of Syngenta’s IT, responsible for offering a highly flexible, managed and secure Cloud first infrastructure for applications. As an Intern within the Cloud & Compute team, you will be part of an agile DevOps team and will develop applications, automation, or enhance tools that improve our Cloud platform services.

Duration:
June 2019 – August 2019

Essential Duties & Responsibilities:
- Develop/enhance tools to enable migration of the applications to AWS.
- Find manual operational tasks that can be automated and then implement it to remove friction.
- Find and implement ways to optimize use and cost of compute resources in AWS.
- Solicit feedback from the team in order to drive internal feature requests.
- Offer solutions and support to resolve customers’/users’ issues.

Education & Experience:
- Currently pursuing a Bachelor’s or Master’s degree in Computer Science, Computer Engineering or related field with a graduation date on or after December 2019
- Programming experience with at Java or Python or a similar programming language
- Understanding and familiarity of AWS services is a plus.
- All applicants must be eligible to work in the US

Additional Knowledge, Skills, Traits & Abilities:
- Proactive approach and enthusiasm for problem identification and solving
- Passionate about improving users’ experience
- Curious about and keeps up to date with current technology industry and developments
- Strong ability to research and investigate basic/complex IT related topics.
- Excellent verbal and written communication skills including strong interpersonal skills.
- Ability to lead, be self-directed and/or work independently or as part of a team.
- Be able to demonstrate capacity to work in and contribute to a global team work environment.
Work Level: XZ
