USDA-ARS Livestock Behavior Research Unit

Looking for 2 students to hire for a research project that will begin at the end of October 2017 and continue through May 2018.

It is preferred that they would want to work 10-12 hrs per week.

Responsibilities would include:
Daily care of lactating sows and their litters
Use of power tools and building materials
Daily cleaning and live animal measurements
Lifting and moving heavy objects (> 50 lbs)

It is preferred that the students would have some previous experience using power tools since there will be some building involved. Also, weekend availability during the Spring 2018 semester would be required.

Pay would be at the GS-1 level ($10.21/hour).

Please send a copy of your resume to Jay.Johnson@ars.usda.gov
