WinField Summer Internship Opportunities in IN/IL/MI

CROP SCOUT

Taking place at a local retailer, agronomy crop scout interns are given an opportunity to connect classroom knowledge to the field first-hand. The summer will consist of learning to identify weeds, diseases, and insects affecting crop growth and development. You will gain experience testing soil and plant nutrients, and analyzing reports used to make crop protection product recommendations with an experienced agronomist. You will complete miscellaneous operations work and provide customer service to growers. This internship comes with training prior to start date. Although agronomy knowledge is helpful, no previous experience is required.

Interested students, please send your resume and cover letter directly to Nick Koewler – Nkoewler@landolakes.com
