Intelinair, a leading agricultural technology company seeks talented individuals for various internship roles to support our sales and product development initiatives with farmers and ag retailers in key crop production areas in Iowa, Indiana and Illinois.

Location: Field based, across varied locations focused on the US Midwest

Company Description: Intelinair, based in Indianapolis, IN is the developer of AGMRI which is an industry-leading machine learning platform which combines varied data sources to provide actionable crop intelligence that is used to improve crop performance. AGMRI proactively combines extensive data layers of imaging along with existing ag-related databases, machine learning and in-field observations to further develop crop insights that are provided on a season-long basis from planting through harvest.

Responsibilities:
- Intelinair internship roles are focused on activities which will support our continued growth in this critical technology area.
- Sales internships will work at the direction of our field sales representatives and organization leaders supporting the adoption, engagement and scalability of our flagship product, AGMRI, with leading ag retail companies as well as farmers.
- Serves as a support resource and will work at the direction of our agronomy team to further the development of new cutting-edge formats and to collect data from farm fields which will assist to validate new product concepts in support of AGMRI to include field scouting.
- When working for Intelinair, interns will enjoy a breadth of opportunities to apply their knowledge, creativity, and skills in support of helping to improve farm productivity through leading channel partners within ag retail.
- Intelinair is committed to developing a culture of team accomplishment while maintaining a healthy work-life balance for employees. Our growing company also provides opportunities for growth and advancement.
- Participates in any education training programs required for the development of skills and knowledge to perform the role.

Qualifications:
- Successful candidates for the Intelinair internship positions should possess the following qualifications:
  - Currently pursuing a degree in an agricultural field - agronomy, general agriculture and agricultural technology
  - Agricultural industry experience, either through a previous job/internship experience, or a Midwestern US farming background – including an aptitude in mobile apps and new technologies
● Demonstrated knowledge of row crop production, with a focus on general agronomic practices, crop input management and general expectations for successful crop management
● Excellent written and verbal communication skills, enjoys working in a collaborative team environment
● Flexible and adaptable to the changing needs of customers within the growing season
● Understanding of Google Workspace
● Ability to work in an outdoor environment and able to lift up to 50 pounds.
● Must have a valid driver's license, access to a vehicle and have the ability to travel independently
● Must demonstrate a strong work ethic, be a self starter and operate effectively as a team member
