Through its continuous and ceaseless efforts, the Digital Photogrammetry Research Group (DPRG), led by Dr. Ayman Habib, aims at becoming an acknowledged world-class center for teaching, learning and research in the field of photogrammetry.

As a part of its mission, the group also looks to produce higher level graduates who are readily employed in the photogrammetry and Geospatial Information System (GIS) industries, to undertake quality research, and to foster close links with both local and international photogrammetry/GIS communities.
