

**David LeBauer, Ph.D.**

Research Scientist

University of Illinois / National Center for

Supercomputing

[delebauer@illinois.edu](mailto:delebauer@illinois.edu)

Dr. David LeBauer is a Research Scientist with the University of Illinois at Urbana-Champaign and Research Fellow with the National Center for Supercomputing Applications. His scientific interests are focused on the use of computing and informatics to advance the pace of scientific discovery aimed at development of more sustainable and productive agricultural ecosystems. He leads the construction of the TERRA Reference Phenotyping Platform informatics and computing pipeline. David earned his Ph.D. in Earth System Science at the University of California—Irvine.
