

ARMS II & Chemical Use Adjuvants

An adjuvant is a chemical added to a pesticide to increase its effectiveness or safety. Adjuvants include such materials as wetting agents, spreaders, emulsifiers, dispersing agents, foaming agents, foam suppressants, and penetrants.

Adjuvants should be **excluded** from the table in Section D.

However, if you or the respondent are in doubt about whether a product should be included in Section D, record it anyway and write notes to explain the situation.

Below is a partial list of adjuvants that were identified during previous surveys.

Adjuvants

Actamaster	Crosshair	Maatyx
Adept	Denali-EA	Methsoyol
Affix	Drop-Point	Mission
Antero	Efficax	Nexum
Arvon	Embed	One-Ap XL Complete
Atomix	FS Layout	R-11
Barrala	FS MSO Ultra	Rainier-EA
Brandt	F S Transformer	Reliable COC
Brandt Magnify	Firezone	Renegade-EA
Brandt M.S.O	Gateway NG	Siltrate Advanced
Brandt Super 7	Gateway Plus	Silwet* 408
